The top of the breech of the barrel, part of lock and hammer excessively ornamented by carving in relief, the deeply sunk hollows, interspersed amongst the raised work, which are filled with gold inlay. The Butt is beautifully carved and the lower part of the stock is ridged, wooden slide patch box which is covered with most elaborately ornamented brass, which is carved and engraved. This is a wonderfully handsome gun and must have been made to order regardless of expense; broken at grip and rather poorly repaired but otherwise in very fine state of preservation. See illustration on Plate 1.

127. CROSSBOW OF GERMAN MAKE; exceptionally whole and complete condition. Very nicely carved, animal head effigy with ivory teeth of very unusual design. Pistol-grip stock with small cheek-piece.
